

Lap Band Procedure

Lap Band Procedure

Tasha, 36, went through with the lap band procedure back in December and says that one of the reasons Why Lap Band Worked for her has been the immediate weight loss. In the months following the procedure, Tasha shed nearly 30 pounds. Tasha commented that she has much more energy now, another reasons Why Lap Band Worked for her.

Like many other individuals, Tasha's problem was that she tried a number of traditional weight loss programs, but those efforts met with very few successful results over time.
